

**NEED A SOIL OR WATER  
SAMPLE DONE?  
CSU Extension CAN HELP YOU WITH THESE TESTS!!**

The Colorado State University Extension Office offers "free" soil bags and water bottles. THEN, you send your personal check with the bags and sample bottles of water mailed off for testing.

**Simply stop by our office at 1120 Summit Street in Norwood.**

For example, for a Bacteria Water Test, come by our office for a bottle and paperwork that would have to go to Grand Junction. (The Health Dept. charges a fee which you will include with your water. **(Remember this water can't sit over 30 hours, we recommend you send off your samples through the Post Office on Monday.)**)

For a Minerals Water Test, simple pick up that bottle here and the paperwork. The company charges a fee also.

For a Soil Sample, stop by our office for soil bags and paperwork. A fee will go in with the soil bag if mailing to Ward Labs. CSU Lab bills with results.

Any questions contact the webmaster or call the Colorado State University Extension Office at 327-4393. You can use a plastic bag (AIR DRY SAMPLE FIRST) or paper bags.

Contact us for a CSU or Ward Soil, Water testing kits, Feed/Forage or Plant Testing kits and paper work.
