

San Miguel and West Montrose Counties Extension is part of team of Mountain County Extension Offices that was awarded an Innovation Grant from Colorado State University Extension to do a study growing vegetables at high altitude in raised beds using different season extension techniques. The other grantees are Eagle County Extension and Teller County Extension. We will be working with the CSU Greenhouse Specialist, Brooke Edmonds.

Our beds are going in behind the Fruen Building in Telluride and will be planted early Spring 2011. Check back periodically for updates.
